an **ACTEON** company

InterMoor offers a chain inspection service for all chain grades and sizes, under all classifications. This service is worldwide and covers a specialist area, including semisubmersible rigs, floating production, storage and offload units, and vessel and offshore installations.

InterMoor is accredited as a service supplier for the survey examination of mooring chain for mobile offshore units in accordance with a DNV approved program that enables the company to work independently under DNV rules.

InterMoor's chain, wire, anchors and jewelry inspection capabilities include:

- cleaning (water or sand blast);
- visual inspection;
- measurements;
- non-destructive testing

InterMoor Inc. is the **only** US-based company to be DNV accredited to certify and recertify mooring chains and related components such as connecting links and wire rope for mobile offshore units that have or will have DNV classification (DNV-OSS-101 and 102).

InterMoor Inc. provides these services for both offshore and shore side operations, for the Gulf of Mexico, Central and South America and West Africa. For other regions, InterMoor's global chain inspection division ChainCo can assist all customers with their chain inspection units and mobile stud press units.

InterMoor Inc. is ISO 9001 and 14001 certified.
